

License Plate Wiring Guide

Thank you for purchasing XTC Power Products License Frame

Please read the instructions fully and familiarize yourself with the components before starting the install.

NOTE: When installing make sure that wires are run away from any hot or moving parts and properly secured.

Mount the License Frame in the desired location using the provided hardware, make sure it is visible per your State VC
Crimp a Butt connector on the Red and Black power wires from the Turn System
Crimp the License Plate Wires or the Extension Wires on to the Butt Connectors
White is Positive and goes to the Red Wire, Black is Negative and goes to the Black Wire
If extending the wires use two more Butt connectors as shown above
Using a heat gun, heat the ends of the butt connectors to seal them
Verify Operation, Power up the ATS or TSS and make sure the LEDs are lit
Secure the harness using the supplied Cable Ties.
